

Why is the Access Management Plan Needed?

- **Safety** – Reduces accident frequency and severity by decreasing vehicle conflict points. Safety is the main goal of the plan.
- **Mobility** – Increases the ability to travel efficiently despite increasing traffic.
- **Consistency** – Provides a consistent design standard for all cities, the county, and developers to follow to ensure safety and mobility.
- **Preservation** – Identify right-of-way necessary for the future vision of the entire length of Idaho 55 in Canyon County.
